

Name: Sample

Draw and label a part of a coyote, heron or willow that helps it survive.

How does this part help it survive?

Coyotes have big ears that help them hear well. They can hear sounds that are far away or very quiet so they can avoid danger. Coyotes have brown fur that helps them camouflage so they can sneak up on prey.

Willow has roots that help them stay in the ground and drink water. Willow leaves help them catch sunlight to make food.
