

# POLLINATION DEMONSTRATION<sup>1</sup>

## SUPPLIES:

- Flowers models (make petals out of cardstock, and use a small container to create the inside of a flower)
- Pollen (cocoa powder)
- Nectar (Starburst candy)
- A pollinator (student volunteer)

## SET-UP:

### STEP 1:

**Put one Starburst into each model flower. This will represent the nectar of the flower.**

### STEP 2:

**Cover the Starbursts with cocoa powder. This will represent the pollen of the flower.**

## DEMONSTRATION ACTIVITY:

Choose one student to be a “pollinator” and have them look for nectar (Starburst) inside the first flower using their fingers. Repeat the same process to the next flower.
